PROCUREMENT DIVISION WEEKLY REPORT FOR
PERIOD ENDING 5 OCTOBER 19831. Progress Report of Tasks Assigned by the DCI/DDCI:

No tasks assigned during this reporting period.

2. Items or Events of Major Interest that have Occurred
During the Preceding Week:

a. Delta Data Electronic Data TEMPEST Terminal, Model 8260T - Delta Data Systems Corporation now offers a TEMPEST Terminal, Model 8260T, that is functionally and operationally the same as the old Model 7260T but is packaged differently (3 separable pieces - the electronic package, the CRT, the keyboard); is much more appealing to the user, and is about one-half the price of the old terminal. Approval was granted on 9 September 1983 to award a new two and one-half year contract to Delta Data for purchase of the new terminal. The new Contract (Number 83-B-859900-000) which was negotiated with Delta Data Systems Corporation is a Requirements-Indefinite Delivery/Indefinite Quantity Type Contract against which Delivery Orders will be placed on an As Required basis. The pricing structure which was agreed to and set forth in the Contract is as follows:

UNITSORDERING QUANTITYUNIT PRICE

U N C L A S S I F I E D

There is also a proviso in the contract to the effect that should Delta Data sell their terminal (in like quantities) to any other customer at a lower price, then the Agency will be charged that same price.

It should also be noted that this new contract is unclassified

b. Fiscal Year (FY-84) Renewals - In addition to fulfilling all known requirements with respect to processing outstanding FY-83 procurement actions prior to the end of the fiscal year, the Automated Data Processing & Engineering Branch (ADP&EB) within the Office of Logistics (OL), Procurement Division (PD) was also able to initiate, by contract award - contingent upon the availability of funds, approximately 75 known FY-84 renewal actions in an effort to preclude a potential break in service and avoid a beginning of the year rush for execution of such renewals. This prior year procurement activity on the part of ADP&EB has greatly enhanced its ability to satisfy new FY-84 requirements in a manner never before possible because of previous backlogs of FY-84 renewal actions.
